

Ayarlanabilir kollar

Teknopolimer, çelik ya da paslanmaz çelik kenetleme parçası

KALDIRMA KOLU GÖVDESİ

Cam elyafı ile güçlendirilmiş poliamid bazlı (PA) teknopolimer, RAL 7021 (C1) gri-siyah renk, RAL 2004 (C2) turuncu renk, RAL 7035 (C3) gri renk, RAL 3000 (C6) kırmızı renk, mat kaplama.

Metal sıkma elemanına bağlantı için dahili çinko alaşımlı dişli bağlantı.

STANDART UYGULAMALAR

TORX®*a uyması için altı loblu soketli tespit vidası.

AISI 302 paslanmaz çelik geri dönüş yayı.

- **ERZ-A:** dişli delikli ve tespit vidalı kara-oksit çelik kenetleme parçası.
- **ERZ-SST:** dişli delikli ve tespit vidalı AISI 303 paslanmaz çelik kenetleme parçası.
- **ERZ-p:** dişli saplamalı ve tespit vidalı kara-oksit çelik kenetleme parçası.
- **ERZ-SST-p:** dişli vidalı ve tespit vidalı AISI 303 paslanmaz çelik kenetleme parçası.

ÖZELLİKLER VE UYGULAMALAR

Özellikle, yer yokluğu nedeniyle kaldırma kolunun dönme açısının limitli olduğu durumlar için uygundur.

Gömülü çinko alaşımı eklentinin metal dişleri, özel montaj gereklilikleri durumunda makinayla kolaylıkla değiştirilebilecek, tamamen metalden yapılmış kenetleme parçalarının kurulmasına olanak verir.

KULLANIM TALİMATLARI

Bağlamak için, kolu kaldırıp bağlantı parçasının dişlerini serbest bırakın ve bağlantı pozisyonuna geri getirin. Kolu bıraktığınız anda yay yardımı ile otomatik olarak dişler yeniden birleşir.

Eğer kol 360° dönüş yapamaz ise, altıgen soketin önünde baş vida sayesinde bağlantı elemanı kolayca vidalanmış olabilir (kolun dişleri serbest kaldıktan sonra).

* TEXTRON INC. tescilli ticari markası.

* Renk indeksini tamamlayın, örnek: 237102-C1 ERZ.44-A-M4-C1
