

Antimikrobiyal korumalı teknopolimer

Metal Detectable technopolymer, easy cleaning

MALZEME

Glass-fibre reinforced polyamide based (PA) technopolymer, RAL 5001 blue colour, matte finish.
FDA uyumlu hammaddeden üretilmiştir (FDA CFR.21 ve EU 10/2011).
The special technopolymer contains additives detectable by means of metal detectors.

STANDART UYGULAMALAR

- **VTT-SST-MD**: AISI 304 paslanmaz çelik göbek, dişli kör delik.
- **VTT-SST-p-MD**: UNI 947 : ISO 4753'e göre AISI 304 paslanmaz çelik dişli tabanca çivisi, pahlı uçlu (bkz.Teknik veriler sayfa).

ÖZELLİKLER VE UYGULAMALAR

The RAL 5001 blue colour is easily visible in case of accidental food contamination. Furthermore the material additives are metal detectable at a cubic particle size of 5mm per side.

In order to improve the detection, the metal detector calibration must take into account the food/substance type at risk of contamination considering the moisture contained in it.

Particularly suitable for applications in the food and pharmaceutical industries.

The three-lobed shape with large recesses ensures an effective grip even with work gloves.

The design without rear cavities, generally adopted for reducing thickness, prevents unhealthy residues from depositing, ensuring easy cleaning. Particularly suitable for applications on machines and equipment whose parts must be frequently cleaned by using water jets or steam.
